DIEGO STIMOLA

ABOUT ME

My journey began by studying Architecture, which provided me with broad knowledge about space design and constructive typologies. Four years in my career I started studying TV Production, earning a degree, and gaining the experience that helped me understand the timing, work methods and different needs of any given production team.

SKILLS

My work experience goes from recreating the Buenos Aires of the 1700 and spacey science fiction, to shows for toddlers or soap operas, to name a just a few projects. This has made me familiar with the most diverse of aesthetics. Noteworthy achievements include the recently 2009 International EMMY nominated History Channel show "Historia Extrema", projects for the most important TV production companies in Argentina like ENDEMOL, DISNEY LATINOAMERICA, CUATRO CABEZAS, RGB/ CRIS MORENA GROUP, and for one of the most important Argentinean fashion photography studios: The Gaby Herbstein Studio. At the moment I'm located at Madrid where I had the pleasure of working with actors as big as Sancho Gracia and Willy Toledo.

STUDIES
